

Software and Web Programmer (Level I)

Acumen, LLC offers candidates the unique opportunity to develop and apply software development skills to further the goals of social and health policy research. Acumen is fast paced and rapidly expanding. We are in the unique situation of being a small firm with large clients, requiring all members to work on a diversity of projects and platforms. We are seeking highly motivated candidates to join our team.

Position Description:

This position will assist in developing and configuring systems for research and analysis to support both in house and client needs. All Level I software developers will be expected to:

- Configure web applications.
- Develop, test and maintain web applications to process and present information.
- Develop and maintain software used to collect and analyze information for a variety of projects.
- Perform other responsibilities as required.

Qualifications

- BA/BS in Computer Science / Engineering degree required.
- Proficiency in .NET Framework (C# & VB) required.
- Knowledge in relational database concepts and SQL statements required.
- Detail oriented, analytical and fast learning skills desired.
- Understanding of web / internet / networking technologies desired.
- Interest in health and social policy research desired.

This is not a contract position, and we are not interested in QA testers. This is a full time position, with salary based on experience and/or education. Benefits provided.

To apply, please visit our website at www.acumenllc.com/jobs. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, or national origin.
